

LIGHT-DUTY MAKE-READY PROGRAM

Project Cost Template

This template is designed for contractors performing work under the Central Hudson EV Light-Duty Make-Ready Program. The site information and project cost components are needed to process an application and calculate an incentive. This template should serve as a reference when developing the quote but can not replace the official quote. Please reference the Participant Manual for more details on required documentation.

Eligible Costs

Central Hudson covers electrical infrastructure on both the utility and customer-side of the meter. Utility-side costs will be documented separately from this form and will be finalized through the standard new/upgraded service request process. Equipment associated with the EV charger, such as the charger itself, station installation, modules, mounting hardware, bollards, signage, networking, freight, and co-located distributed generation, are ineligible for incentives under the EV Make-Ready Program.
